ENSIGN

ENSIGN is an all new patient care system that combines the very latest in embedded sensor technology with existing Wi-Fi infrastructure to enhance caregiver productivity and patient comfort and safety.

FEATURES

- Fast configuration & setup via smartphone app & no cabling required.
- Bed Sensor Pad (BSP) installed discreetly under mattress to maintain safety and professional standards.
- BSP suits most beds and mattresses.
- ENSIGN can just as easily monitor one patient or ten thousand.
- ENSIGN's unique scalability ensures effective utilisation of capital; you only pay for what you need today, not what you may need tomorrow.
- Optional 4G Module for when reliable Wi-Fi is not available.
- A caregiver-friendly Patient Status Page (PSP) displays important patient information.
- Live monitoring of individual patients can be shared with approved people (eg doctor, occupational therapist, family).
- Downloadable detailed daily & historical trend reports.
- Expand functionality with auxillary add-ons such as an incontinence sensor, nurse call button or any of the cura[1] cordless range of devices.
- Easily customised SMS & email alerts.

WHAT CAN ENSIGN MONITOR?

- Real-time heart & respiration rates.
- Out of bed alarm with optional timer delay.
- Sleep monitoring with sleep quality assesment & score.
- Turn-over care timer and alerts.
- Wellness check alerts staff when a patient needs checking.
- Excessive movement or restlessness alerts.

WHAT'S IN THE BOX?

5000 Bed Sensor Pad (BSP) | BSP & Cable Fastener Kit | Wi-Fi or 4G Module | AC Adaptor | Connecting Cable

1 YEAR WARRANTY

Certifications may vary between products.
