Helping To Care

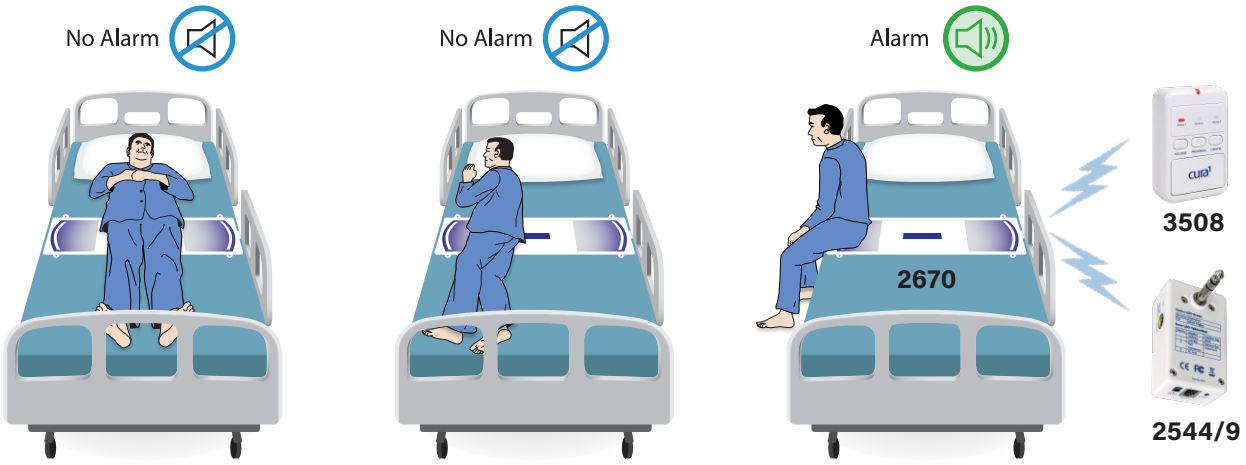

... alerts earlier so you can respond faster

2670 PreAlert Cordless Bed Pad

A caregiver has more time to prevent a potential fall when they receive an early warning of a patient or resident sitting or rolling to the edge of the bed. PreAlert Cordless Bed Pads are smarter than conventional bed sensor pads.

- Provides early warning when a patient or resident sits on the edge of the bed.
- No more cords between monitor and pads.
- Guaranteed for 15 months.
- Comes with transmitter & Securing Clip Set.
- Simple operation and maintenance.
- User friendly setup and no ongoing fees.
- The pad incorporates a delay function in the centre area to help prevent false alarms.
- Full width bed pressure pad means reliable operation with practically no false alarms.

Default delay setting in the center reduces the incidence of false alarms.

Repositioning in bed such as rolling to one side will not cause an alarm.

Sensor pad initiates the alarm when patient sits up and moves toward the edge of the bed.

WHAT'S IN THE BOX (2670)

2670 PreAlert Bed Pad

2659 Securing Clip Set

The best solution for an ***early warning*** *of out of bed alarm.*
